

NS-1

Bedside cabinets

## Part of the nursing beds

Bedside cabinet are an integral accessory of nursing beds. They increase the comfort and independence of client during hospitalisation and at the same time reduce the burden on the nursing staff.

## NS-1

Double-sided bedside cabinet with hinged adjustable dining table top suitable for nursing environments. Increases comfort and independence for clients with reduced mobility. A wide range of decore ensures a perfect match with the interior of the room.

## Drawer

The drawer with a drop-out safety catch can be supplemented with a lock (independent or as a central key system), so that the patient's personal belongings are always safe.

## Tiltable dining table

The dining board can be locked in three positions, which greatly contributes to client comfort and increases the work efficiency of the nursing staff.

## Plastic drawer insert

The plastic drawer insert is divided into two parts for easier organisation of personal belongings. It is also easily removable and cleanable.

## Dining table height adjustment

The smoothly adjustable gas piston height adjustment has several advantages over other types of height adjustment systems. These advantages include ease of operation, speed and smoothness of height adjustment, as well as durability and long service life.

## Load capacity

The safe load on the tabletop is 10 kg in the middle and 5 kg at the end.

## Optional equipment

### Lockable drawer and container

The drawer and container can be locked on request.  
The client does not have to worry about losing personal items.

### Towel holder

The bedside table can also include a towel holder.  
The holder is located on the side of the table, this way the client will always have the towel at hand.

### Choice of design

The choice of colour design allows you to create an aesthetic and pleasant space for clients and staff that can help improve mood, comfort and reduce stress.

## Easily accessible shelf

The open storage shelf is particularly suitable for personal items of frequent daily use.

## Container

Container with space for personal belongings and enough height for a PET bottle. The double sided design of the container is a versatile solution that allows the use of a bedside table on both sides of the bed.

## Storage space for shoes

A practical shoe storage compartment is located at the bottom of the table.
