

URGENT  
Transport stretcher

# URGENT

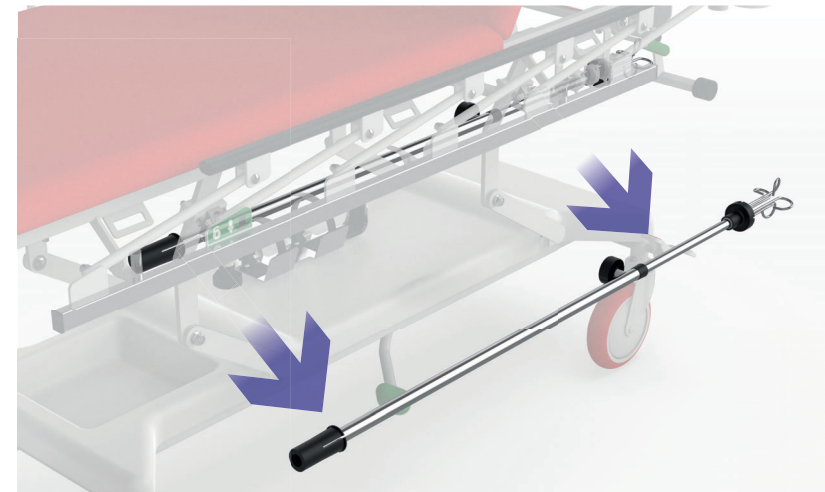

Transport stretcher for fast and safe transport of patients

Medical staff will appreciate the easy handling, ergonomic and intuitive controls and the full range of functions. Large castors and a lightweight design ensure high mobility and easy handling. The handrails are equipped with the SAFE GAPS safety system, which eliminates the risk of pinching or trapping the hands during folding. URGENT can be complemented with a wide range of optional accessories.

## High load capacity

The solid and robust construction with a load capacity of up to 230 kg forms a secure support for patient care.

## Infusion stand transport holder below the mattress platform

The infusion stand holder is conveniently placed below the mattress platform so that it is always immediately available.

## Choice of colour

The choice of colour design for the leatherette of the couch allows patients and staff to create an aesthetically beautiful and inviting space that can help improve mood, comfort and reduce stress.

## Positioning of the back part

Thanks to the gas piston rod, the positioning of the back part of the couch is easy and simple to control.

## Hydraulic height adjustment

For easier access to the patient, the couch is equipped with a hydraulic lift of the patient area ergonomically located in the middle of the couch.

## Safe side rails

The protective side rails along the mattress platform can be easily folded down to provide immediate access to the patient. Thanks to the SAFE GAPS safety system, the risk of pinching or trapping the arm during folding is eliminated.

### Medical leatherette mattress platform

The comfortable mattress is upholstered in medical leatherette, which has anti-static protection with antimicrobial properties.

### Foldable head transport handle

The transport handle behind the patient's head allows quick folding when necessary, which is especially appreciated during resuscitation.

### TENTE brand castors

High-quality medical castors with central brake, reducing physical effort for staff. Castors are made of permanent non-marking material. Castor covers facilitate cleaning and extend the life of the castors.

### Oxygen bottle holder

The oxygen bottle can be safely stored and transported thanks to the special holder below the mattress platform.

### Plastic chassis cover

The plastic cover makes daily cleaning easier and faster. It also protects the chassis mechanisms, thus extending the life components and the overall reliability of the stretcher.

### Bumper wheels

The bumper wheels located at the corners of the mattress platform are a great help especially during transport.

## Technical parameters

Outer dimensions .....	208 x 88 cm	Mattress platform material .....	Upholstered medical leatherette
Dimensions of mattress platform .....	200 x 72 cm	Fixation belt set.....	Yes
Mattress platform positioning .....	Hydraulic	Transport handle at head.....	Yes foldable
Backrest positioning .....	0° - 85°	Horizontal accessories holder .....	Yes
Backrest mechanism.....	Piston rod	Transport brackets for infusion stand under the mattress platform .....	Yes
Safe operating load .....	230 kg	Oxygen bottle holder on chassis .....	Yes
Maximum patient weight .....	195 kg	Mattress with anti-static cover .....	Yes
Weight.....	90 kg	Bumper wheels .....	Yes
Types of side rails .....	Folding, hinged, stainless steel	Plastic chassis cover .....	Optional
Castors .....	Metal, 200 mm	Transport handle at foot .....	Optional
Brake type .....	Central	Hygiene paper roll holder .....	Optional
