

ELEVA H
Examination couches

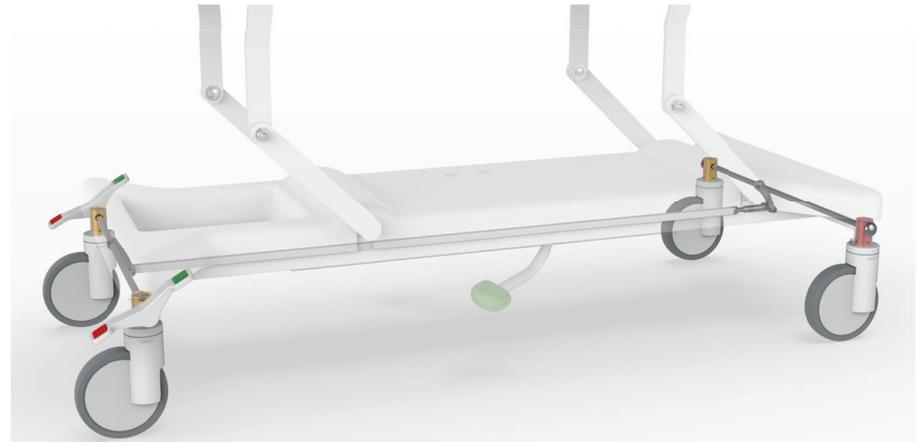

ELEVA H

ELEVA examination couches are an innovative solution for doctors and medical staff who need to examine patients in admissions and surgeries. These couches are designed with the need for height positioning of the mattress platform, which is often essential for correct patient examination.

High load capacity

The solid and robust construction with a load capacity of up to 230 kg forms a secure support for patient care.

Central brake

Safe handling is ensured by a central brake. Thanks to the possibility of locking one wheel in the straight direction of travel, the recliner can be easily operated by only one person during transport.

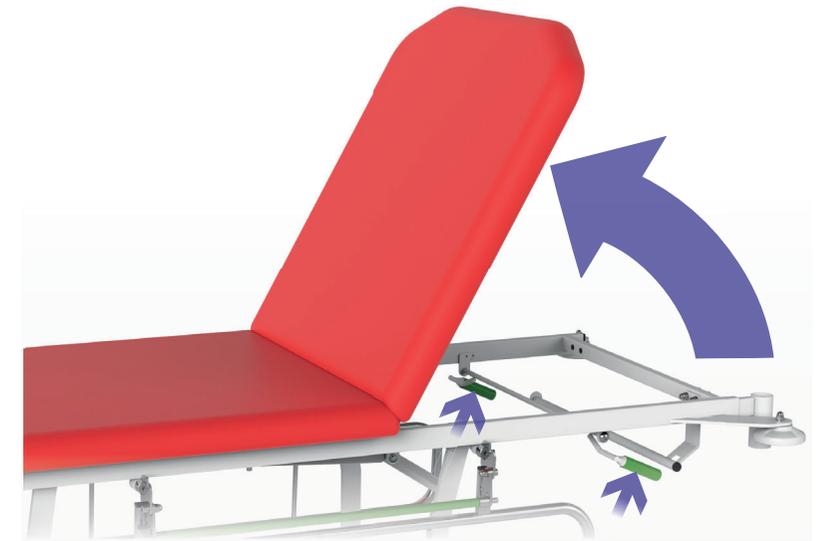

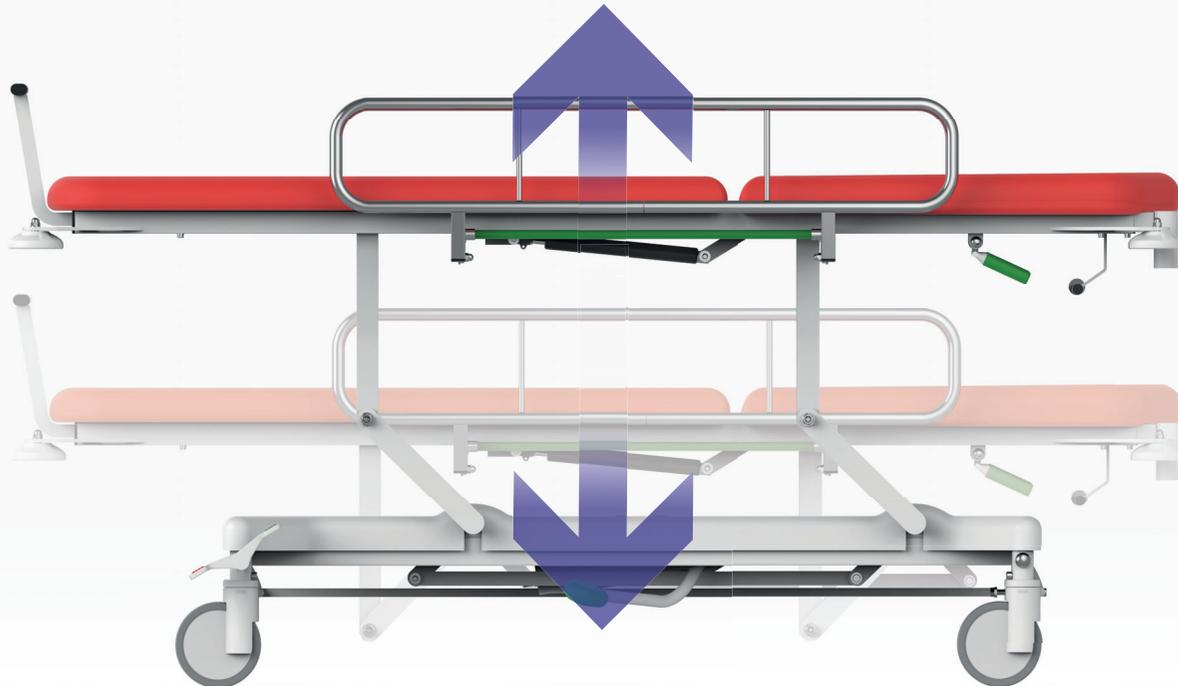

Choice of colour

The choice of colour design for the leatherette of the couch allows patients and staff to create an aesthetically beautiful and inviting space that can help improve mood, comfort and reduce stress.

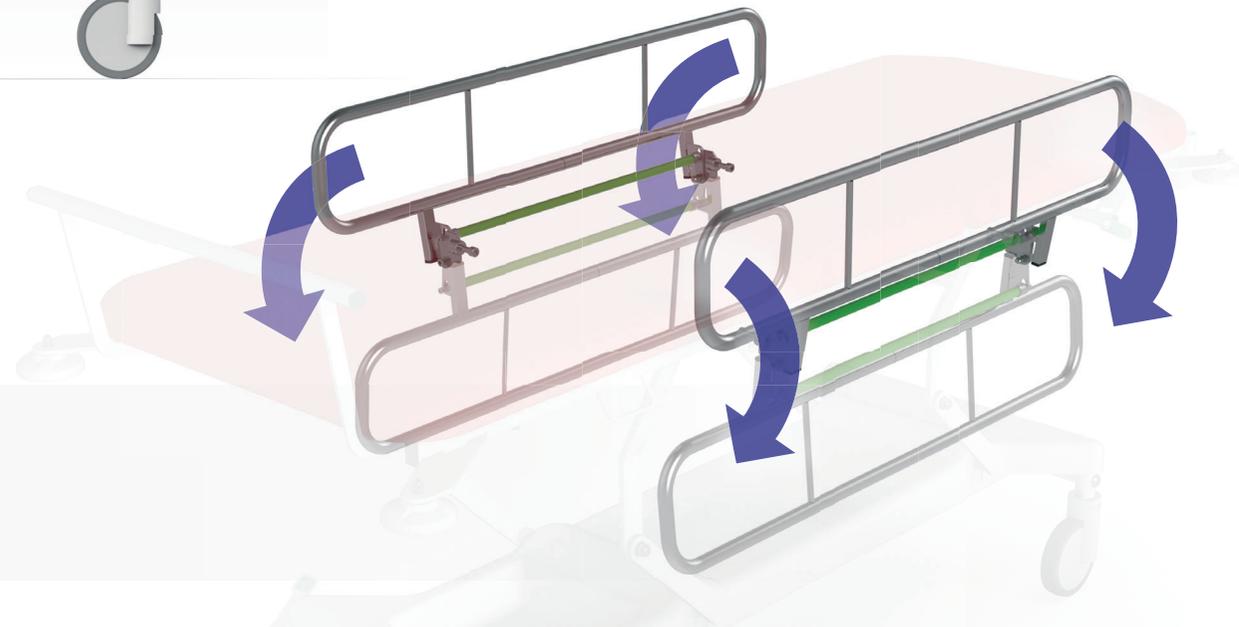

Hydraulic height adjustment

For easier access to the patient, the couch is equipped with a hydraulic lift of the patient area ergonomically located in the middle of the couch.

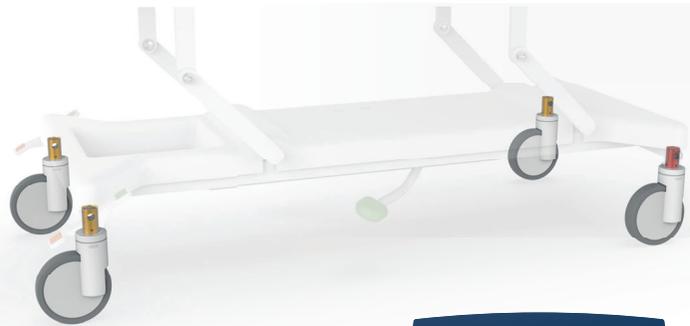

Positioning of the back part

Thanks to the gas piston rod, the positioning of the back part of the couch is easy and simple to control.

Tiltable side rails

Protective side rails along the mattress platform can be easily tilted to provide immediate access to the patient.

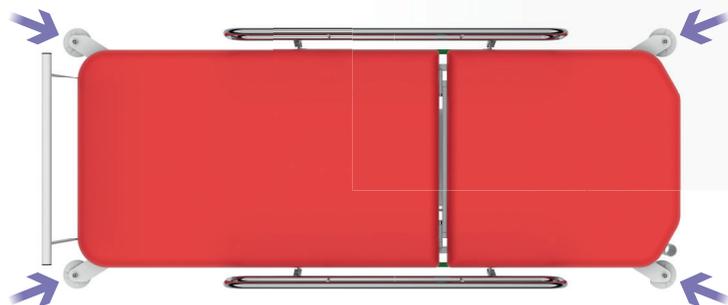

TENTE brand castors

High-quality medical castors with central brake, reducing physical effort for staff. Castors are made of permanent non-marking material. Castor covers facilitate cleaning and extend the life of the castors.

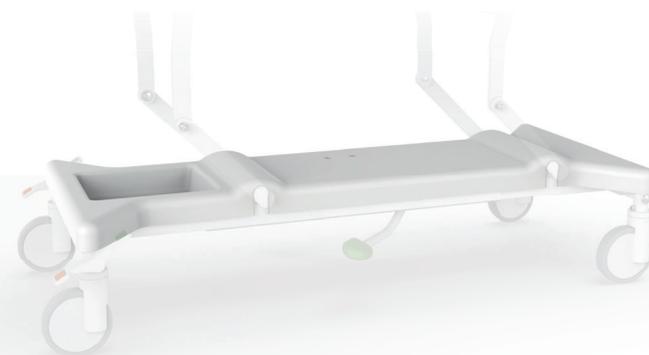

Medical leatherette mattress

The comfortable mattress is upholstered in medical leatherette.

Bumper wheels

The bumper wheels located at the corners of the mattress platform are a great help especially during transport.

Plastic chassis cover

The plastic cover makes daily cleaning easier and faster. It also protects the chassis mechanisms, thus extending the life of the components and the overall reliability of the couche.

IV pole holder

The couche can be equipped with an IV pole holder.

Hygienic paper roll holder

Hygienic paper holder can be found under the mattress platform.

Technical parameters

| | | | |
|---|-----------------|----------------------------|-------------------------------------|
| Outer dimensions (length x width)..... | 208 x 88 cm | Type of side rail | Tiltable stainless steel (optional) |
| Dimensions of mattress platform (length x width)..... | 200 x 72 cm | Bed surface material..... | Medical leatherette |
| Height of mattress platform..... | 52 - 89 cm | Plastic chassis cover..... | Yes |
| Lift of the mattress platform..... | Hydraulic | Paper roll holder..... | Yes |
| Safe operating load..... | 230 kg | Transport handle | Yes (optional) |
| Weight..... | 78 kg | Bump wheels..... | Yes (optional) |
| Maximum patient weight..... | 195 kg | Face hole..... | Yes (optional) |
| Castors | 150 mm, plastic | IV pole holder..... | Yes (optional) |
