

RESTINO

Cardiac chair

RESTINO

The RESTINO cardiac chair with folding armrests, an adjustable backrest, footrest and back part is primarily designed to achieve an optimal resting position for people with impaired heart function and for the elderly.

Folding armrests

For easy access even from the side, the chair is equipped with folding armrests that you can fold up when you don't need them.

Adjustable

The lounger is equipped with positioning of the back and foot part. The patient can easily adjust the position of the chair according to his needs without much effort.

Choice of color design

The choice of color design of the chair allows patients and staff to create an aesthetic and pleasant space that can help improve mood, comfort and reduce stress.

Optional accessories

The cardiac chair can be equipped with, for example, an IV pole, reading table or a safety belt.

Armrests with U-shaped upholstery

Thanks to the specially shaped "U" shaped armrests, the chairs can be used as sampling chairs and are thus suitable for transfusion stations.

Quality ergonomically shaped comfortable upholstery

The ergonomic shape of the upholstery is designed to provide optimal support for different parts of the body. This helps reduce pressure on key points and minimizes discomfort when sitting for long periods of time.

TENTE branded wheels

The chair is equipped with branded TENTE wheels that can be braked separately.

Unique seat tilt mechanism for easy standing up

Unique seat tilt mechanism for easy standing up. Smooth movement when getting up ensures a more comfortable and trouble-free use of the cardiac chair.
